SHE HAS EXPENSE FUND

New York, April 9.—Further mystery was added to the case of "Mrs. Randolph Fitzhugh," who is held in the Tombs on a charge of stealing mesh bags from society women, when it became known to-day that Abraham Levy, a prominent criminal lawyer, had been paid \$10,000 in cash to take the woman's case.

At the time of her arrest in the Hotel Flanders on March 13, charged with stealing a ogld mesh bag worth \$500 from Miss Dorothy Fiske while the latter was at worship in St. Bartholomew Church, the woman, who called herself Mrs. Fitzhugh, but who later declared that she was Mrs. Alfred S. Northrup, of Washington, declared repeatedly that her family was one of the most prominent in the South, and that if her relatives learned of her trouble they would spare no money or influence to set her free.

Dispatches from Pensacola, Flaz, said that she probably was the daughter of General E. A. Perry, formerly Governor of Florida, and that she had married Conrad Strong, a well-known business man of Pensacola.

After an intensely dramatic scene in the Jefferson Market Court, where she was arraigned on March 20, when Munsey, appeared as complainants against her, she was held in \$3,000 bail for the grand jury, On April 1 she was arraigned before Judge Malone in the Court of General Sessions and further remanded for trial upon her plea of "not guilty."

Mr. Levy to-day said he was convinced of his client's innocence. He refused to reveal the identity of the friends who have contributed to the expense fund for the young woman.

ELECTRIC POWER At Your Finger Tips

Just throw a switch and central station power, unlimited, and unfailing, is at your service. It eliminates the smoke, noise and dirt of your private plant, the problems of fuel purchase, the annual depreciation and insurance.

Central Station Power Is Most ECONOMICAL

Electric power economizes on overtime work and during the dull season. You do not have to operate your entire power plant for one department or one machine, you pay only for the power you use. No loss of power from the friction of transmission.
